## Assembling & Care

---

Clean the porcelain often to prevent dirt and limescale deposits forming. If your regular detergent does not give the desired result, try citric acid or tartaric acid. Dilute according to the manufacturer's instructions and apply to the WC bowl. Wipe/rub the damp surface dry and rinse thoroughly. Remove limescale deposits with household vinegar. Dilute according to the manufacturer's instructions. Heating the vinegar will provide an even better result. Never use abrasive detergents. They damage the glaze over time. And never use strongly alkaline, lye-based blockage removers that can damage the porcelain surface and harm the environment.
